

AUGUST 2007

THE MOST IMPORTANT PASTA PRODUCER IN FRANCE IS NOW
A CUSTOMER OF EUROIMPIANTI

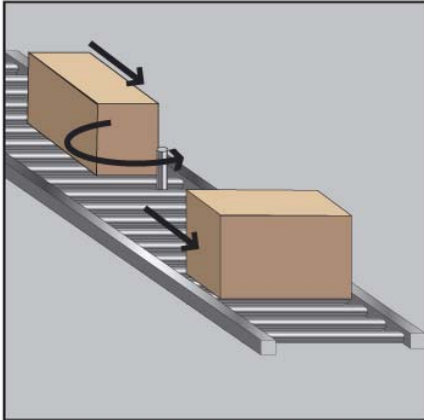

CUSTOMER'S REQUIREMENTS:

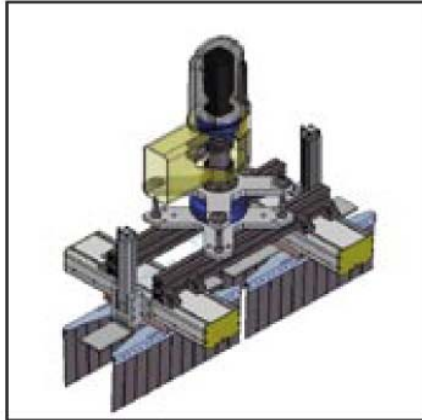

- *Medium - high* production;
- Several *different formats*;
- *Fragile* products;
- *Single machine* for packages with different consistency (carton boxes and flow-packs);
- *Complex* pallet patterns.

SOLUTION: Automatic Palletising

A completely automatic palletising cell with robot model Skilled 504.

The packages are mechanically oriented and prepared for the pick-up on the infeed conveyor.

The pick-up gripper is designed to handle in only one move fragile packages (boxes or bundles);

A single, automatic empty pallet dispenser for the two different lines.

ADVANTAGES:

- ▶ Production increase;
- ▶ The "soft and gentle" handling of the product results in a very low rejection rate;
- ▶ Accurate palletisation improves load stability for better transportation;
- ▶ High flexibility (user friendly format change);
- ▶ Low noise level.
